

Why Join the Movement?

Pull in your friends and help us build a platform owned by the community, not by big tech.

The Buyer Experience

The Perfect Match: We help you find exactly what you need with precision.

Escrow Protection:

- We shield you from dishonest sellers.
- Funds are held securely in escrow.
- Money is only released once the product or service is delivered exactly as advertised.

The Seller Advantage

Market Exposure: Get your products in front of the right audience without predatory ad fees.

Robust Protection:

- Safeguards against bad buyers and delivery disputes.
- Reputation-based filtering: Persistent bad actors are removed to maintain ecosystem health.

A Shared Future: Instead of sending capital to foreign advertising giants, we reinvest in **you**. We are building a team, not just a user base.

Early Adopter Incentives

Join now to secure your stake in the platform's liquidity.

Signing Bonus:

- Get free discount tokens worth $0.6 \times T$ (60 tokens) upon signup.
- These tokens are utility-driven and can be used for:
 - ▶ Reducing transaction fees on orders.
 - ▶ Covering advertising fees to promote your own services and products.

The Viral Effect: Mathematical Growth

The 40% referral pool rewards the “connectors.” When a new user (Luise) joins and orders, the tokens are distributed up the chain:

- **Luise (Level 0):** $0.6 \times 100 = 60$ tokens
- **Charles (Level 1):** $0.4 \times 0.6 \times 100 = 24$ tokens
- **Anna (Level 2):** $0.4^2 \times 0.6 \times 100 = 10$ tokens
- **Ben (Level 3):** $0.4^3 \times 0.6 \times 100 = 4$ tokens

The Logic: Every step away from the signup reduces the reward by 40%.

Why Join the Movement?

Thus: If you invite your friend, who knows an influencer, who manages to invite 1000 people you'll make $1000 * \text{Level 3} = 4000$ tokens.

Integrity & Fair Play

Can I automate 500 accounts for tokens? Technically yes, but they remain dormant.

The Safeguards:

1. **Activity Trigger:** Tokens only activate once an account is involved in a real money transfer (order).
2. **Identity Link:** We enforce a “One Person, One Phone Number” policy.
3. **Legal Compliance:** You can only legally verify and activate tokens for a single primary account eg identified by mobile phone number.
